Our Fireplaces

Whatever the style of your home or personal taste you are certain to find a PureGlow fire surround or suite that suits your space and taste.

Provide warmth and character to any home with one of our beautiful surrounds or suites in a selection of traditional or contemporary styles in a great range of finishes and colours from on-trend grey hues to traditional limestone.

Choose between one of our surrounds that provide the perfect frame to complement your choice of fire, or our fireplace suites which come complete with a back panel or slip set, surround and hearth, simply add your appliance.

All the suites work in conjunction with our extensive range of gas and electric appliances.

If you are looking for a fireplace with a contemporary look our complete fireplace suites give you the opportunity to create the perfect centrepiece for your home. Our complete fireplaces include appliance, surround, hearth, back panel, or slip set.

Suite Pictured:
54" Thurlestone Suite in Portuguese limestone. See page 23 for details.

Aegean Limestone

Our Aegean Limestone surrounds are beautifully distinctive in character. Each surround is exquisitely crafted from natural limestone formed over 50 million years ago, cut straight from the earth.

Aegean Limestone is a much whiter limestone with a soft, speckled grain, which works well in a variety of settings.

Each mantel has its own individual fossil formation, veining, and colour so no two are the same which enhances the beauty and uniqueness of the surround.

Himley

Aegean Limestone Surround

Pictured: 58" Himley surround. Also features the Lytton higher performing gas cast insert and 54" black granite hearth, available separately. The Himley is also available as a complete suite, please see page 10 for details.

Himley

Complete Fireplace Suite

Pictured: Himley complete fireplace suite consisting of 58" Himley Aegean Limestone surround, Chelsea 750VS electric appliance, honed granite slip set and hearth. The Himley is also available as a surround., please see page 9 for details. Coppice Real Log upgrade available on this appliance please see page 51 for details.

Ombersley

Aegean Limestone Surround

Pictured: 58" Ombersley Surround. Also features the Nova 600 flueless stove with standard arched door in black, polished one-piece inlay, grey slate chamber and black granite hearth, available separately.

Wenlock

Aegean Limestone Surround

Pictured: 54" Wenlock surround. Also features the Jubilee higher performing cast insert in highlight finish and 54" black granite hearth, available separately. The Wenlock is also available as a complete suite, please see page 13 for details.

Wenlock

Complete Fireplace Suite

Pictured: Wenlock complete fireplace suite consisting of 54" Wenlock Aegean Limestone surround, Chelsea 750VS electric appliance, honed granite slip set and hearth. The Wenlock is also available as a surround, please see page 12 for details. Coppice Real Log upgrade available on this appliance please see page 51 for details.

Portuguese Limestone

This natural, sedimentary limestone formed over 50 million years ago is cut straight from the earth. Portuguese Limestone features characteristic darker veins on a lighter background, intermingled with fossils of plants and animal life, all adding to the beauty and individuality of this enduring material.

Limestone fireplaces are a classic choice for a fire surround in any room, with such a wide variety of designs there is a surround option to suit whatever the style of your room.

Drayton

Fireplace Suite

Pictured: Drayton Fireplace suite consisting of 50" Drayton surround, hearth & 3 piece back panel in Portuguese Limestone. Pictured: 54" Whitton surround. Also features the Chelsea 400 media electric appliance in antique brass finish and 54" black granite hearth & back panel, available separately. The Whitton natural oak surround is also available in a 48" option.

Fire Options

Whether you are designing a traditional living space from a blank canvas or simply looking to replace your fire there is a selection of traditional and contemporary fires to choose from.

The collection offers a selection of cast iron inserts, flueless fires and a range of gas and electric insets which provide the perfect blend of elegant styling and energy efficiency.

The chimney featured in your home may determine the type of fire you install. The collection offers a range suitable for all situations. Please refer to page 57 to identify which is best for you.

Gas and electric fires have very distinctive flame and aesthetic qualities. A glance at the thumbnail images displayed here should help you appreciate the style of each before making your choice.

Pictured: 54" Hanley complete fireplace suite in Portuguese Limestone. See page 17 for details.

Cast Inserts

We offer a selection of traditionally styled cast iron inserts to choose from. These intricately detailed casts are manufactured to the highest standards. The quality and detail shown here is second to none. Not only is the casting quality first class, the finishing processes are carried out by highly skilled craftspersons.

The collection also features a range of higher performing gas fires. These design-led fireplaces have taken the styling of the traditional insert combined with modern patented gas fires to produce one of the most authentic looking products currently available.

Juliet Cast Insert

Higher Performing Gas Convector in highlight

Also available in open-fronted & glass-fronted options

Flueless Gas Fires

The collection offers two flueless gas fire options with no requirement for a chimney utilising the benefits of modern catalytic technology. These fires are manufactured from high quality castings and are available in a variety of finishes. As no chimney or flue is required all the heat remains in the room giving the fires lower running costs and 100% efficiency ratings.

Surround Notes

All dimensions are provided in mm, please note column G is shown in inches, as a guide only and are subject to a tolerance of 12mm.
Please note columns I, J and K apply to suites and complete suites only.

Flue Types

The Chimney or flue in your house will normally determine what kind of fire you will choose.
Identify which type of chimney you have or whether you have no chimney using the information below.

Class 1

These are commonly found in older houses (pre-1960) and are identifiable by a 7" (180mm) or greater diameter flue. Prior to installation of a new fireplace, an existing flue must be structurally sound and checked for blockages.

Class 2 (Prefabricated)

These are found either in an older house where the existing flue has been lined with a proprietary steel flue or in a newer house with a steel flue built in. Identifiable by a 5" (130mm) or greater diameter flue and a steel flue terminal.

Class 2 (Pre-Cast)

Many newer properties that do not have chimneys are fitted with pre-cast flues made from hollow concrete or clay blocks. These travel vertically up through the cavity wall of the property to a ridge vent or metal flue terminal on the roof.

No chimney

Modern houses often have no chimney, and one option is a PureGlow flueless appliance or a balanced flue cast insert which have no requirements for a chimney.

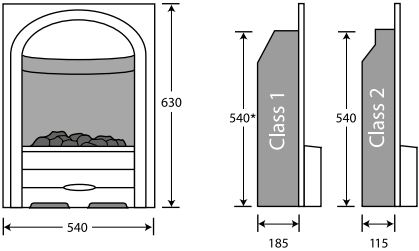

Alternatively you can choose from our wide range of electric appliances which can be located in virtually any room in your home.

Installation

Your PureGlow fireplace is made up of a number of different components and it is important to ensure that your installer has the necessary qualifications and experience to fit ALL the components of a fireplace.

All appliances are supplied with detailed, comprehensive installation and user instructions. All installations must be in accordance with the manufacturer's instructions, current building regulations and subsequent British standards. The installation should only be carried out by a qualified competent person. Failure to comply with these requirements may render the appliance unsafe in the first instance, impede on the efficiency and serviceability of your appliance and ultimately invalidate any warranty.

All installers in order to satisfy the terms and conditions of our warranty must be registered with the appropriate regulating bodies as deemed by PureGlow. All gas installers within the UK must be registered with the Gas Safe Register. In the Republic of Ireland the Board Gais.

It is important that you retain all documentation following the installation as this will be required in order to activate the warranty if needed. The documentation should be supplied by building control following successful registration of each installation by the installer together with any commissioning certificates, benchmarks and service records completed in the rear of the installation manual.

No liability is accepted for problems caused by poor installation or misuse of our products.

All PureGlow products should be fully inspected prior to installation as no responsibility for re-fitting, repairs or redecoration can be accepted if defective products have been installed. If installing a PureGlow surround in conjunction with a fire not manufactured by PureGlow, please refer to the manufacturer for suitability.

General Information

All the images throughout this brochure are for illustrative purposes only and are as accurate as possible. Some natural materials may vary due to the nature of the products, but if the colour you require is critical then please consult your retailer before basing all your decisions on the colours shown here.

Some room sets may appear not to comply with the requirements of the latest building regulations, we would always advise that you check your proposal with your approved fitter before proceeding with any project.

There are occasions when designs, or products are altered or discontinued without prior notice (a reserved right), so if you are about to set your heart on a particular fireplace, please consult your retailer before making that final commitment.

Before committing to a fireplace, please discuss your particular installation with your retailer who will provide expert advice and carry out a survey.

For cleaning, maintenance and warranty details please visit PureGlow.co.uk

Disclaimer: We reserve the right to change or withdraw details, prices or specifications without prior notice. Every effort has been made to ensure the accuracy of information in this brochure. All dimensions are given for your convenience and should only be used as a guide. Colour reproduction is as accurate as current printing methods allow. We cannot be held responsible for changes or matters outside our control.
